**HB 2157**

**Brief Description:** Consolidating certain salmon recovery activities and programs within the recreation and conservation office.

**Sponsors:** Representative Springer; by request of Governor Gregoire.

**Brief Summary of Bill**

- Changes the authority and duties of certain entities involved in statewide salmon recovery and watershed health programs.
- Consolidates certain salmon recovery activities and programs within the Recreation and Conservation Office.

**Hearing Date:** 2/19/09

**Staff:** Anna Jackson (786-7190)

**Background:**

Currently, a number of state agencies and offices are involved with statewide salmon recovery and watershed health programs, including the Governor's Salmon Recovery Office (Recovery Office), the Salmon Recovery Funding Board (Recovery Board), the Forum on Monitoring Salmon Recovery and Watershed Health (Forum), the Recreation and Conservation Office (Conservation Office), the Department of Ecology (DOE), and the Washington Department of Fish and Wildlife (WDFW). The Recovery Board provides grants for salmon recovery, while the Forum is charged with providing greater coordination on monitoring recovery efforts throughout the state. Administrative support for the Recovery Board and the Forum is provided by the Conservation Office, which contracts with the WDFW. Funding for water resource inventory area planning units and lead agencies to develop and implement watershed-based plans, however, is provided by the DOE.

### The Governor's Salmon Recovery Office.

The Recovery Office coordinates and assists in the development, implementation, and revision of regional salmon recovery plans as part of a statewide strategy for salmon recovery [RCW 77.85.030(1)]. The Recovery Office is responsible for maintaining the statewide salmon recovery strategy to reflect applicable provisions of regional recovery plans, habitat protection and restoration plans, water quality plans, and other private, local, regional, state, and federal plans and projects that contribute to salmon recovery [RCW 77.85.030(2)]. The Recovery Office also has the authority to take a number of actions related to salmon recovery in the state, such as assisting state agencies, local governments, landowners, and other interested parties in obtaining federal assurances that plans are consistent with fish recovery under the federal Endangered Species Act; acting as a liaison to local governments, the state congressional delegation, the United States Congress, and federally-recognized tribes on issues related to Washington's salmon recovery plans; and providing recommendations to the Legislature to improve salmon recovery efforts [RCW 77.85.030(4)].

### The Recreation and Conservation Office.

The Conservation Office is a state agency responsible for administering the programs and activities of the Recreation and Conservation Funding Board (Conservation Board), the Recovery Board, and the Invasive Species Council [RCW 79A.25.010(7)]. The Director of the Conservation Office, in coordination with the Office of the Governor and the Office of Financial Management, has the authority to prepare and update a strategic plan for the acquisition, renovation, and development of recreational resources and the preservation and conservation of open space [RCW 79A.25.020]. The Conservation Board, in turn, is charged with creating and implementing a unified statewide strategy for meeting the recreational needs of Washington's citizens. In conjunction with other state and local agencies and the Governor, the Conservation Board is also responsible for representing and promoting the interests of the state on recreational issues; providing and encouraging interagency and regional coordination, as well as interaction, between public and private organizations; administering recreational grant programs and providing technical assistance; and serving as a repository for information relating to recreation [RCW 79A.25.005].

### **Summary of Bill:**

#### Changes in Authority and Duties of Salmon Recovery Entities.

A new provision is added regarding legislative findings related to state investments in watershed-based activities, salmon recovery efforts, and entities involved in state-wide salmon recovery efforts.

The Recovery Office is responsible for administering grant programs that support the functions of lead entities involved in developing and submitting habitat project lists for a particular area. The Recovery Office also must provide an assessment to the Governor by December 1, 2009, regarding additional coordination and incentive opportunities with lead entities and agencies, regional salmon recovery organizations, and water resource inventory area planning units. By the same deadline, the Recovery Office also must recommend one pilot project outside of Puget Sound that will effectively integrate salmon recovery and watershed planning missions and objectives. Finally, the requirement that the Recovery Office must submit a biennial State of the Salmon Report is removed and replaced with the requirement that the Recovery Office prepare and submit a biennial Consolidated Report on Salmon Recovery and Watershed Health

(Consolidated Report). The Consolidated Report must include a summary of the projects and programs funded by the Recovery Board and a summary of progress in general in achieving salmon recovery, as measured by high-level indicators and state agency compliance with requirements established by the Forum.

The Forum is required to adopt general high-level indicators for salmon recovery and watershed health by December 1, 2009. By July 1, 2010, the Forum is also responsible for adopting protocols for monitoring these high-level indicators that will enable monitoring efforts to be capable of reporting results that will ensure reporting consistency and agency compliance under the consolidated reporting requirement administered by the Recovery Office. Finally, the Forum must indicate how the general high-level indicators are consistent with, and complement, the more detailed regional and local metrics used to measure salmon recovery and watershed health.

The DOE is required to provide recommendations to the Legislature by December 1, 2009, on grant programs related to restoration and protection of water quality and quantity supplies that may be more effectively and efficiently funded through the Recovery Board.

The requirement that the Recovery Board must provide a biennial report to the Governor and the Legislature on salmon recovery expenditures is removed.

The requirement that the Washington State Department of Transportation, the WDFW, and the DOE, in conjunction with the tribes, convene a work group to develop policy guidance to evaluate mitigation alternatives is also removed.

Consolidating Salmon Recovery Provisions under the Recreation and Conservation Office.

The provisions regarding the office and the Forum are moved from the Salmon Recovery section of the Revised Code of Washington (chapter 77.85 RCW) to the section on the Recreation and Conservation Funding Board (chapter 79A.25 RCW).

**Appropriation:** None.

**Fiscal Note:** Available.

**Effective Date:** The bill takes effect 90 days after adjournment of the session in which the bill is passed.
